

How to order a replacement tree

To order your replacement tree, review the list of recommended trees and select one that is well-suited to the site requirements. Fill in the Tree Removal & Replacement Form, then call the Middle Tennessee Electric right-of-way specialist for your district.

First our tree trimming crew will completely remove the problem tree, including grinding the stump and hauling off the wood. Then a tree planting contractor will install the

replacement tree according to the *MTEMC Guidelines for Planting Trees Near Powerlines*. Your new tree will be guaranteed to live through one growing season (until leaf drop) or it will be replaced by the contractor at no charge.

If a tree on your property must be removed but you do not wish to replace it with a tree from the MTEMC Replacement Trees list, you may opt to receive a \$45.00 cash equivalent instead.
